Models

⌵

GroqCloud currently supports the following models:

Production Models

Note: Production models are intended for use in your production environments. They meet or exceed our high standards for speed, quality, and reliability. Read more [here](#).

MODEL ID	DEVELOPER	CONTEXT WINDOW (TOKENS)	MAX COMPLETION TOKENS	MAX FILE SIZE	MODEL DETAILS
distil-whisper-large-v3-en	HuggingFace	-	-	25 MB	Details
gemma2-9b-it	Google	8,192	-	-	Details
llama-3.3-70b-versatile	Meta	128K	32,768	-	Details
llama-3.1-8b-instant	Meta	128K	8,192	-	Details
llama-guard-3-8b	Meta	8,192	-	-	Details
llama3-70b-8192	Meta	8,192	-	-	Details
llama3-8b-8192	Meta	8,192	-	-	Details
whisper-large-v3	OpenAI	-	-	25 MB	Details
whisper-large-v3-turbo	OpenAI	-	-	25 MB	Details

Preview Models

Note: Preview models are intended for evaluation purposes only and should not be used in production environments as they may be discontinued at short notice. Read more [here](#).

MODEL ID	DEVELOPER	CONTEXT WINDOW (TOKENS)	MAX COMPLETION TOKENS	MAX FILE SIZE	MODEL DETAILS

allam-2-7b	Saudi Data and AI Authority (SDAIA)	4,096	-	-	Details 

Deprecated models are models that are no longer supported or will no longer be supported in the future. See our deprecation guidelines and deprecated models [here](#).

Hosted models are directly accessible through the GroqCloud Models API endpoint using the model IDs mentioned above. You can use the `https://api.groq.com/openai/v1/models` endpoint to return a JSON list of all active models:

`curl` `JavaScript` `Python`

```
1 import requests
2 import os
3
4 api_key = os.environ.get("GROQ_API_KEY")
5 url = "https://api.groq.com/openai/v1/models"
6
7 headers = {
8     "Authorization": f"Bearer {api_key}",
9     "Content-Type": "application/json"
10 }
11
12 response = requests.get(url, headers=headers)
13
14 print(response.json())
```
